

My Project references

manvit rithwik reddy
hari shiva rama krishna

28/08/2026

1 circuit making references

we took help of google and our fellow classmate krishna madhur in basic circuit connections.

2 code building and changes

we had code already, built by G.V.V sir we had some compilation issues so we changed the code according to our circuit with the help of gemini.

3 document creation in latex and commands on terminal/powershell

we didn't know anything about latex and commands on powershell, so we completely relied on gemini AI.
